# ABOUT HABLO

## educational programs

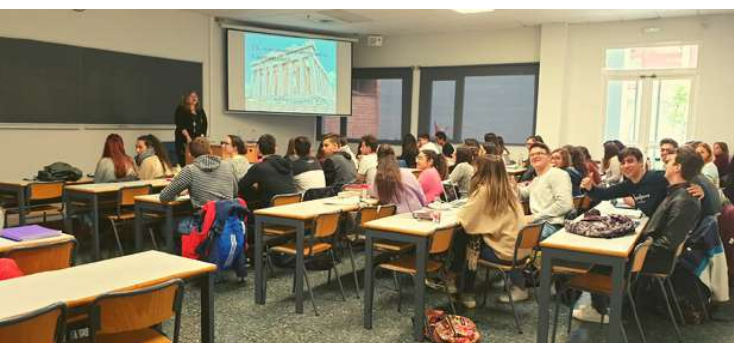

Hablo is your pathway for studying and start your professional career in Spain and the rest of Spanish speaking countries. We offer services to international students like our **online** or **onground foundation language programs**, which will allow students to start their academic adventure in the most prestigious universities in Spain. At Hablo we will guide and protect our students from the beginning of our foundation courses until the day that they get their diploma.

We work only with the best universities and educators to delivery courses full of life where our students will learn their way to their dreams.

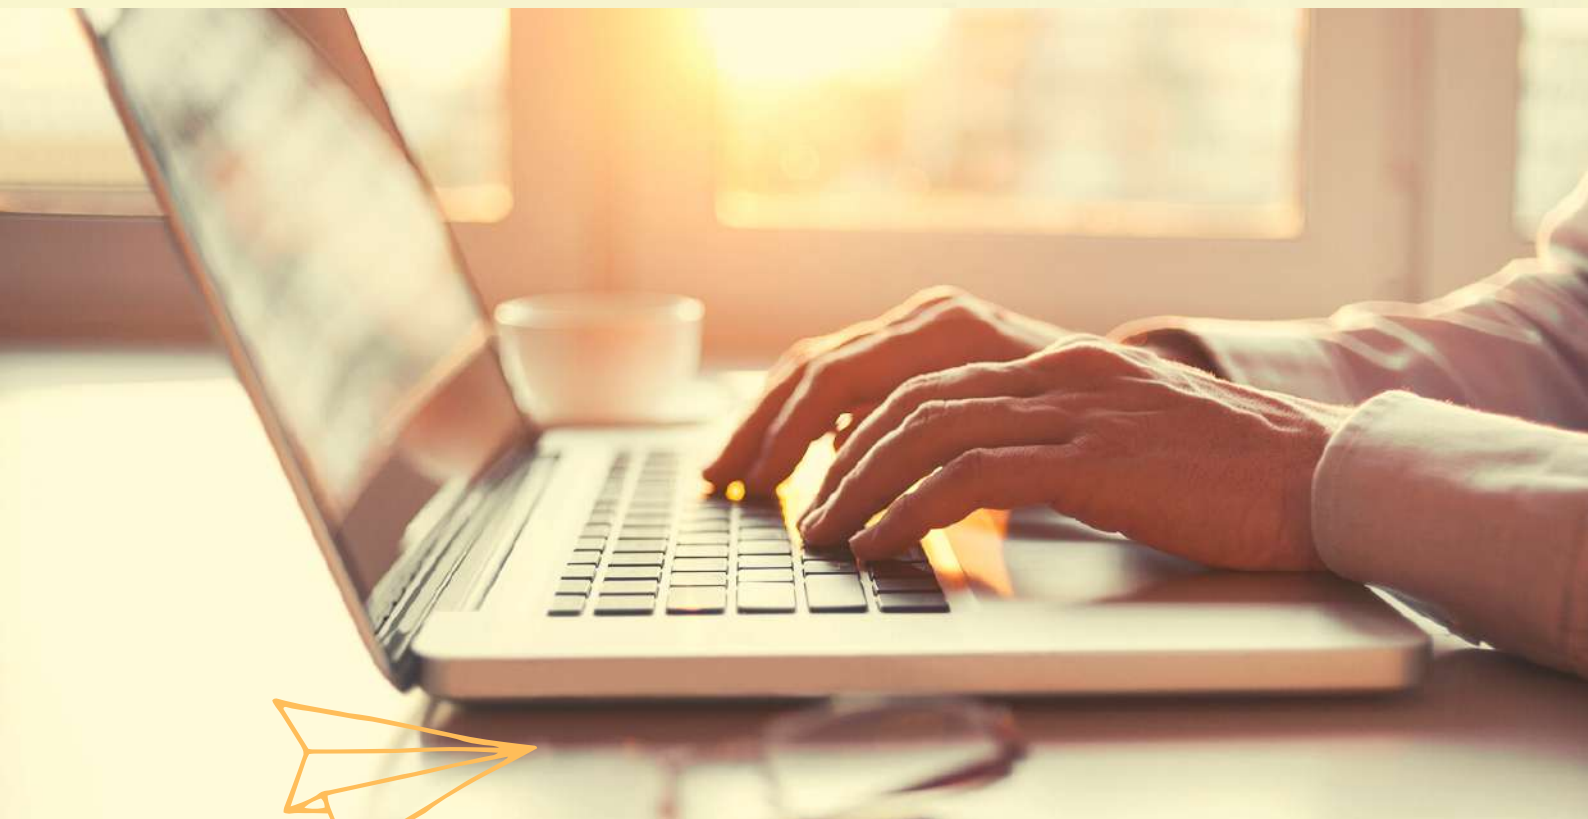

Lucas Moragues

Director of Hablo Educational Programs

# WHY STUDYING SPANISH IS BECOMING SO IMPORTANT?

**It is the 2nd Most Spoken Language in the World.** It is estimated that more than half billion people speak Spanish as a native language, qualifying it in second place, after Chinese and before English.

**There are 21 Spanish-Speaking Countries in the World.** Spain, Mexico, Argentina, Bolivia, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, El Salvador, Equatorial Guinea, Guatemala, Honduras, Nicaragua, Panama, Paraguay, Peru, Puerto Rico, Uruguay, Venezuela

**It's the Second Language in the USA.** U.S. Job Market demands Bilingual Spanish speakers. However, as the world becomes more globalized and companies expand their reach global, the demand for bilingual employees is ever growing.

**The percentage of bilingual professionals is rising every day.** In a world where the most of the people speaks already two languages, the professionals who know more than that has higher chances to differentiate themselves amongst their peers.

# WHY SHOULD YOU STUDY IN SPAIN?

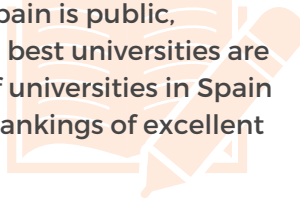

1

**Fascinating Cultural Heritage.** Spain has the third most UNESCO protected heritage patrimony, which means that you will walk in some cities feeling that you are in another time period.

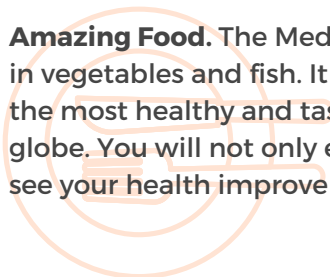

2

**Great Educational System.** Majority of the educational system in Spain is public, therefore the best of the best universities are public. A vast number of universities in Spain are in the international rankings of excellent universities.

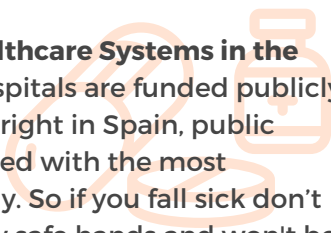

3

**Amazing Food.** The Mediterranean diet is rich in vegetables and fish. It is considered some of the most healthy and tasty food around the globe. You will not only enjoy yourself, but also, see your health improve if you give it a try.

4

**One of the Best Healthcare Systems in the World.** Since the hospitals are funded publicly and considered as a right in Spain, public hospitals are equipped with the most advanced technology. So if you fall sick don't worry, you are in very safe hands and won't be burdened with a large medical bill.

5

**Great people.** Spain is well known for acceptance and diversity. The Rights of woman, LGBTQ Rights, Race Rights, and Religious rights are guaranteed. So no matter who and how you are, you will be accepted here.

# ONGROUND FOUNDATION LANGUAGE PROGRAM

## Description:

Our onground programs consists of 2 intensive language and cultural courses designed for the complete understanding and writing of Spanish academic level. We guarantee that those students will be able to write, read and express themselves in Spanish language at the end of our course. Our courses are from A1 till B1.

Our onground courses are provided by professors from the UPV with a wide experience In the most modern and advance language learning processes. Where you will grow your vocabulary through discussion on current affairs, study real-world subjects to make learning come alive, learn how to express your opinions and challenge the ideas of others and to learn how to give presentations and write academic essays.

## Study in Spain:

Our onground foundation program allows you to full immerse yourself at UPV right away. Students here will live learn, and study like the locals. With our extensive services, fantastic courses provided to our onground students, we are sure you will fall in love with UPV and the city of GANDIA (Valencia).

### Your pathway

Apply for our onground foundation program in october or january.

Fly to our onground foundation program.

Enroll in your graduate or undergraduate program.

# THE CAMPUS

## → The City

Gandia is a sunny paradise visited by more than half million tourist every year. It's a student friendly city with everything that you need all in one place.

## → Campus location

The campus is only 5 minutes walking distance from the beautiful Mediterranean sea and is surrounded by beautiful mountains which will allow you to visit the nature by having a short walk.

## → Community

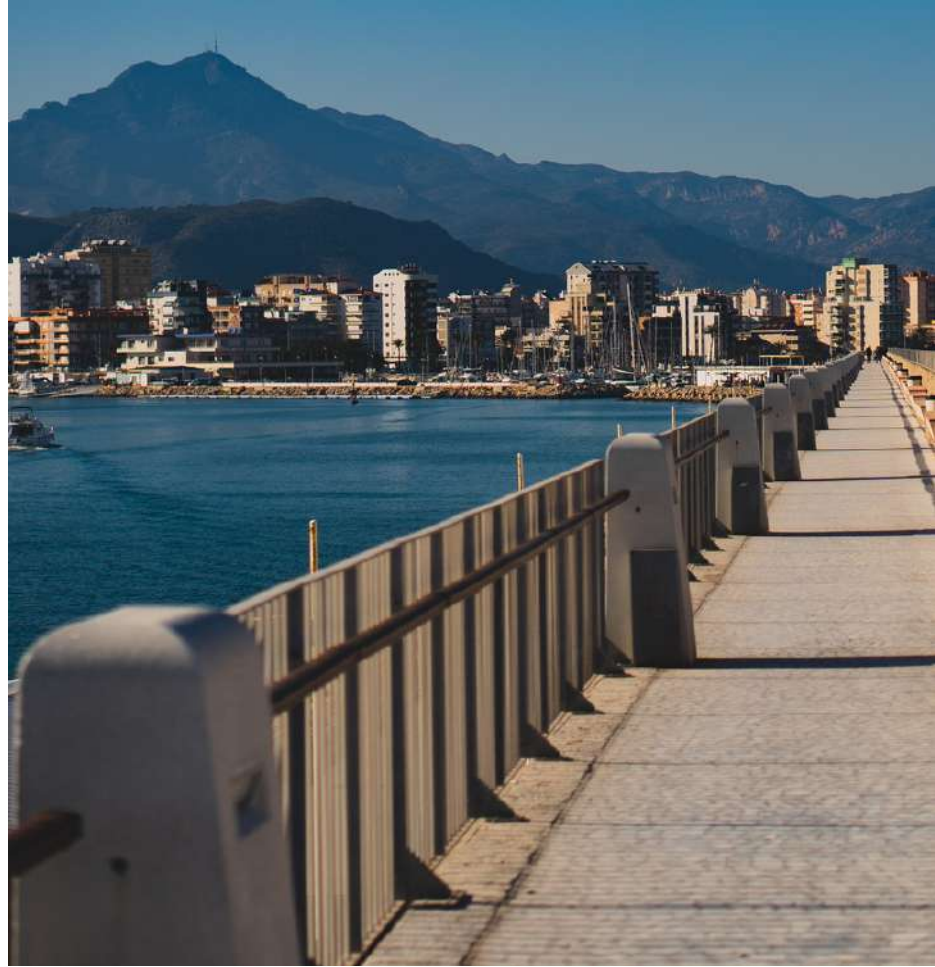

At the campus, you will find an international community with people from all around the global waiting to meet you and make you feel at home.

## → Facilities

The latest technologies will be at your disposal to guarantee that your education has no limitations.

You will also enjoy free access to the amenities such as football fields, basketball court, volleyball court, rock wall pavilion, ping pong tables, gym, yoga classes, latin dancing sessions, combat lessons and much much more to enjoy your free time.

# GANDIA CAMPUS, IN THE SHINY CITY

NEXT COURSE STARTING JANUARY 2021

NEXT COURSE STARTING JANUARY 2021

# START YOUR PATHWAY TO THE UPV

**#1 Spanish technological university in world**

ARWU (Shanghai Ranking)

**336th university in the QS world Ranking**

**Over 30000+ students are studying at the UPV every year**

**One of the best research universities in Europe**

**One of the best employability rates in Europe**

# WHY SHOULD YOU STUDY AT THE UPV?

The Universitat Politècnica de València (UPV) is a public institution, dynamic, and innovative, dedicated to research and teaching that, while maintaining strong links with the social environment in which it develops its activities, opts for a strong presence abroad.

It is a young university, which recently celebrated its 50th anniversary during the academic year 2018-2019. Its community is made up of about 34,000 students, 3,600 professors and researchers and 1,500 administrative and service professionals distributed among its three campuses located in Alcoy, Gandia, and València.

At present, the UPV is constituted by 13 university centers, of which 9 are higher technical schools, 2 are faculties and 2 are higher polytechnic schools. In addition, it has a Doctoral School and 3 affiliated centers (Florida University, Berklee College of Music and EDEM Business School).

Since its beginnings UPV has had a long tradition in partnering with local and multinational enterprises in various research fields which has positioned the University as one of the most reputed European research universities, and is the top Spanish university in patent registrations.

This close relation with the private sector enabled UPV to awarded last year as one of the universities in Europe with higher employability rates. You will be able to compete for a job inside of the university in case you want to do some extra money or apply for internships in any of the companies which are in connection with the UPV.

Due to its ranking, UPV is a well known university in Europe and globally, so once you finalize your degree you will open plenty of doors for your personal and professional career. Do not forget that UPV also invests in its students and has a project-founding initiative for start ups growing inside the University. Many students have grown their companies inside the campus and are running now their own business.

# WHAT TO STUDY AFTER OUR FOUNDATION LANGUAGE PROGRAMS?

Follow your dreams...

# BACHELOR PROGRAMS

All the students with a **B1 certificate** of Spanish language from our foundation program and holding a valid high school degree who is interested in studying any of the bachelors degrees listed below, will enjoy a direct access to the university. **No minimum GPA** will be required.

**Important Note:** Remember that the education is subsidized by the Spanish government and that the student will be paying between a 10% and a 20% of the actual cost of the degree. The prices of any of the bachelors courses offered may vary from **850€/year** up to **1600€/year** to be payed directly to the UPV. The prices will suffer some fluctuations from time to time, but will never in any case surpass the 1600€/year during the 2020/2021 or 2021/2022 academic years.

## BUSINESS ADMINISTRATION AND MANAGEMENT

**ECTS Credits: 240 (4 years)**

Campus of Alcoi

The students will be able to plan, organize, direct and start up business projects in managerial or intermediate positions, managing the areas of finance, marketing, production, logistics, human resources, international, innovation, and projects.

## TOURISM

**ECTS Credits: 240 (4 years)**

Campus of Gandia

The aim of these studies is to provide the necessary knowledge to plan and manage tourism destinations in a sustainable manner, to direct and manage accommodation, restaurant and other tourist activities, as well as, to design, communicate and commercialize tourist trips. It also teaches how to organize and manage public institutions related to tourism, and communicate in various languages with tourism agents.

## CHEMICAL ENGINEERING

**ECTS Credits: 240 (4 years)**

Campus of Alcoi

This degree trains students who are able to design, build, start up, and manage equipment and facilities in industries involved with chemical processes. This degree enables students to become industrial technical engineerings and is internationally certified with the EUR-ACE Quality Label.

## TECHNICAL ARCHITECTURE

**ECTS Credits: 240 (4 years)**

Campus of Valencia

Graduates in Technical Architecture are professionals who, thanks to the knowledge acquired and the powers conferred by law, play a key role in the building sector. They carry out different activities such as the management of the material to carry out the work, its organization and planning, quality control, occupational hazard prevention and safety, the finances and the cost control and its management.

## ELECTRICAL ENGINEERING

**ECTS Credits: 240 (4 years)**

Campus of Alcoi

Electrical Engineering studies consist of a basic training module; a training module shared by industrial branch; a specific training module in electricity and a final module specific to the student's choice. The Degree in Electrical Engineering enables students to exercise the profession industrial engineer.

## PUBLIC WORKS ENGINEERING

**ECTS Credits: 240 (4 years)**

Campus of Valencia

The Public Works Engineering or civil engineering integrates infrastructures with the territory, the environment and society in a sustainable manner. City planning; the layout of railway networks and roads; the protection of coasts and beaches; safety against floods and earthquakes; the design, construction and conservation of bridges, tunnels, dams and ports, or the integrated management of projects and works, are common activities of civil engineering. The degree trains professionals to offer sustainable and innovative solutions.

## AGRICULTURAL AND BIOLOGICAL ENGINEERING

**ECTS Credits: 240 (4 years)**

Campus of Valencia

Rural and Agrifood Engineering graduates must manage the production of food, with the purpose of obtaining quality products. They must also know, develop and apply science and technology for agricultural and livestock production, the organization and management of agricultural companies, planning and rural development and the implementation of agricultural infrastructure. All this in a respectful way with the environment, and in an economically profitable and socially acceptable manner.

## ENVIRONMENTAL SCIENCES

**ECTS Credits: 240 (4 years)**

Campus of Valencia

The main purpose is to train technical and scientific professionals with knowledge in the scientific, technological, social, economic, legal, and environmental management areas that can work in both private and public companies and in Administrations related to the environment.

## FOREST AND ENVIRONMENTAL ENGINEERING

**ECTS Credits: 240 (4 years)**

Campus of Valencia

The aim of this degree is to train responsible professionals in the sustainable management, preservation, restoration and planning of the natural and forest environment, dealing with both ecosystem services and the use and subsequent industrial transformation of their resources. All the above in an environmentally, economically viable and socially acceptable and appropriate way. The degree enables the pursue of the regulated profession of Forest and Environmental Engineer.

## GEOMATIC AND SURVEYING ENGINEERING

**ECTS Credits: 240 (4 years)**

Campus of Valencia

In the Degree in Geomatics and Surveying Engineering, we offer training in geospatial technologies that allow the capture, management, modeling, analysis and representation of geographic information associated with the territory, through the training in the use of different techniques and methodologies such as remote sensing, photogrammetry, satellite positioning and navigation systems, geodesy, geophysics, Geographic Information Systems (GIS), as well as applications in engineering and building works, the environment, land registry or cartography development and management. In addition, a special attention is paid to the use and development of automation of geospatial information management procedures.

## TELECOMMUNICATIONS SYSTEMS, SOUND AND IMAGE ENGINEERING

**ECTS Credits: 240 (4 years)**

Campus of Gandia

This degree delves into the functioning of the systems used to encode, transfer, receive and process information in any format, be it audio, video or data, through different media. It also includes the study of audio and video systems and equipment, as well as the design of venues for the production and recording of audiovisual material. The curriculum has a practical approach that simulates professional situations, completing language training, economics, business organization and programming courses. This degree enables you to work as a Technical Telecommunications Engineering in the specialities of Sound and Image or Telecommunication Systems.

# MASTER PROGRAMS

The admission process of the master programs are different than the admissions of the bachelors courses. The access to any post-graduate program will depend on the directing team of each master. We advice the students interested in any of the below listed masters to contact us for further information in how to apply.

The duration of the master will also vary (1, 1.5, or 2 years) depending on your choice. The price will be from **2500€/full program** up to **5000€/full program** depending on ETC credits.

## Programs list

1. Parallel and Distributed Computing
2. Environmental Engineering
3. Assessment and Environmental Monitoring of Marine and Coastal Ecosystems
4. Animal Genetics and Breeding, and Reproductive Biotechnology
